An exceptional creative software developer with a zeal to learn and adapt quickly with an excellent work ethic. Knowledgeable in a variety of computer languages and the basic principles of web development and design.

Passionate about integrating technology and business management while making a positive contribution to the business organization. Strongly believe in creating applications that are not just robust and tech-savvy but very appealing to the targeted audience.

HIGHLIGHTED SOFTWARE APPLICATION

SMARTNAV, INTEGRATION OF OBJECT DETECTION

APRIL 2019

URL: https://github.com/AnumAsif/SmartNav

An IoT Smart Navigation system for the visually impaired. It was designed by a team of four talented software engineers with a camera for object detection and an ultrasonic sensor for obstacle detection on the Raspberry Pi micro-controller.

- Implemented TensorFlow (OpenCV) for object detection using the raspberry pi camera
- Configured the ultrasonic sensor to help with obstacle detention.

REFERRAL INK, FULL-STACK DEVELOPER

MARCH 2019

URL: https://referrals-ink.herokuapp.com/

An online application that allows users to post referrals about former employees or students.

- We implemented services with Heroku deployment and PostgreSQL database models for storing user information and referral information.

TECHNICAL SKILLS

- **Strong**: JavaScript, HTML, CSS, jQuery, React JS, Golang, Graphql, Handlebars, Python, AWS, Git
- **Experienced**: Raspberry Pi, Node JS, Angular, Flask, Django, PostgreSQL

PERSONAL SKILLS

- Critical thinker
- Quick Learner
- Strong communications skills
- Great interpersonal skills

JOB EXPERIENCES

STUTERN ACCELERATOR

Oct 2022 – date
Software Engineer Mentor

FUNDIS KENYA
